THOMSONS ITM POLE SHEDS

Thomsons ITM Pole Sheds are available with various tailored options. The standard building in kitset form provides all materials including poles, timber, hardware and Zinalume corrugated cladding, with flashings optional. Sold in either the roof only or roof and three wall models, the standard option provides you with an

efficiently engineered building designed to suit common applications at a competitive price. Thomsons ITM Pole Sheds are designed with total flexibility and can cater for almost any specific requirement you may have. You can close in the front, add roller and access doors. Utilise natural weather protection by including translucent roof

Ask about our range of LVL Widespan Buildings

Up to 11.5m clear spans and 6.0m bay widths make it easy to work in your building. Ideal for industrial use - full range of options available.

sheeting or for additional weather protection, install an eyebrow to the front, use the PVC spouting option to catch your rain water. There are many proven Thomsons ITM Pole Shed applications. Covered yards, workshops, light industrial buildings... the options are endless. We offer an economic option designed to suit your individual needs.

Thomsons ITM Pole Sheds, available in a kitset and you can choose to organise the builder or if you wish, we can arrange experienced contractors to construct your building. On confirmation of your project we provide you with two copies of construction plans suitable for lodging your building consent.
